### ***Tecomet earns Back-to-Back Recognition as One of America's Greatest Workplaces by Newsweek***

Woburn, MA (June 5, 2025) – Tecomet Inc., a leading contract manufacturer of orthopedic implants, instruments, and sterilization trays, announced today it has once again been recognized by *Newsweek* and Plant-A Insights Group as one of **America's Greatest Workplaces** and as **America's Greatest Workplaces for Mental Wellbeing**, earning the prestigious awards for both 2024 and 2025. This consecutive recognition is based on an independent study involving more than 1.5 million company reviews and insights from over 250,000 employees across the United States. The awards highlight Tecomet's consistent commitment to creating a workplace that prioritizes respect, well-being, and opportunity for every team member.

"Being recognized for two consecutive years is a proud moment for all of us," said Jenifer Zbiegien, Chief Human Resource Officer at Tecomet. "Our employees are at the core of our success, and we remain deeply committed to putting people first—whether that's through strong development programs, a safe and inclusive work environment, or policies that support work-life balance."

At Tecomet, culture is built on the belief that great results come from great people. From fostering innovation to ensuring every associate feels valued, Tecomet has built an environment where employees are empowered to do their best work and grow their careers.

"The *Greatest Workplaces* award doesn't just recognize what we do—it reflects who we are," added Zbiegien. "We're proud to share this honor with every Tecomet team member who helps make our culture unique."

#### About Tecomet

Headquartered in Woburn, Massachusetts, with over 16 facilities worldwide across 3 continents and 5 countries, Tecomet is a global leader in the design, development, and manufacture of orthopedic, robotic assisted, and minimally invasive surgical products. Tecomet provides a full range of metal and material conversion technologies, for long-term implants and instrument solutions, including forging, casting, precision-machining, and other value-add services. Tecomet is also a leading manufacturer of precision components to the aerospace & defense industry, producing products used in aircraft engines, missile & satellite propulsion systems, vision systems, and infrared applications. Tecomet meets the requirements of ISO 9001, AS9100, ITAR, ISO 13485, and for decades has been a steadfast partner of quality to its customers.
