June 1, 2016

Woburn, MA - Tecomet, a global and the world's largest contract manufacturer of orthopedic medical implants, cases & instruments and a leading supplier of aerospace & defense forged and precision machined components is pleased to announce the appointment of Mark Kemp as President and CEO. Kemp currently serves as President and Chief Operating Officer. Bill Dow, the Chairman of the Board states, "He has come in with a fresh set of eyes and a refreshing prospective providing guidance and leadership from day one. The Board is very pleased to have Mark with the Company and now stepping up to the CEO role".

Kemp joined Tecomet in October 2015 after spending 16 years with Flextronics in progressively responsible roles where he most recently served as President of the Medical Division. "He has deep experience with M&A and integration, creating shareholder value through strategic selection of well-executed asset deals, leading a top-performing team, and growing a medical division to the number one medical outsourcing partner in the world", said Dow.

"I'm excited and honored to be appointed CEO of such a talented group of people," said Kemp. "I'm very fortunate to follow in Bill's footsteps. I plan on stealing a few pages from his playbook as we plan the next phase of growth for Tecomet."

Bill Dow – who has served as President and CEO of the Company since 2008 – will assume the role of Chairman of the Board and remain involved in strategic growth initiatives of the company.

#### About Tecomet

Founded in 1963 as a development center for Thermo Electron's advanced metal processing technology, **Tecomet** is now the global leader in net shape forging, casting, photochemical etching, precision machining, and metal joining of critical components and complex assemblies for the medical device and aerospace & defense markets.
